

Bear Count

Level 1 (youngest kids): Put one bear on #1 card, 2 bears on #2 and so on.

Level 2: roll one die, and place that many bears on the matching card. If the card is full, roll again.

Level 3: Roll 2 dice, add those numbers together. Place that many bears on the matching card. If the card is already full, roll again.

Level 4: Roll 2 dice. You can add, subtract, multiply or divide to pick what number of bears to use. If all possible cards are full, you roll again. Your goal: to fill the numbers with as little re-rolling as possible.

1	2	3	4
5	6	7	8
9	10	11	12
